

The Wildcat Wire

*A monthly connection between school & home to keep parents informed
February 2010*

Dear Parents,

The shortest month of the year is here! We still have to squeeze a lot of learning in though, so let's be sure to have students here everyday! So far this quarter, attendance is looking good.

If you usually pick your student up from school you surely have noticed the new procedure we are trying, which is keeping car riders in the gym until their ride arrives and a teacher calls for them. It started with the extreme cold weather, trying to keep the students in where it is warmer, but we believe that this also is helping us to keep the car line moving more quickly & be more aware of where students are after school. Thank you for your patience as we have been working out the details of this.

If you have noticed the orange fence on the west side of the playground, that has been put there because very soon they will begin tearing down the old storage building. It will be nice to have some extended space on our playground and eventually we will have fencing put on that end of the playground as well.

Please remember to look at the calendar on the back of this newsletter for important events.

Until Next Month,

Sandra Kent
Principal

DO YOU KNOW ABOUT...????

-Our New Phone System—we have new phones in place so all of the extension numbers have changed. Also the cafeteria no longer has a separate phone number from the main office. If you need to contact the cafeteria, call the main number, 335-1177, and we will transfer you to the cafeteria. **Please remember that we do not interrupt class for phone calls to teachers** but you are always free to leave a voice mail so that they can contact you when she/he has an opportunity.
